1.4) Please comment on aspects of this teacher's teaching you think were particularly good.

- Ameek has amazing pedagogical skills and fosters a welcoming learning environment.
- Ameek is a fantastic teacher! He takes great joy in explaining complicated concepts and is really patient with all students.
- Ameek is a very patient teacher, making sure that we all understand concepts well. I really enjoyed his classes and found him very approachable and willing to help all of us. He also prompted us to articulate our understanding of concepts, to make sure that we had no gaps in understanding.
- Ameek is an amazing teacher and is super comprehensive with students and a dedicated professor. We are very lucky to have the opportunity to take class with him.
- Ameek is an extremely patient and dedicated teacher. He takes great pain to explain the concepts in his classes and answers all the questions. He is also available any questions after classes. he is very thorough with his explanation of problem sets and explains the use of the quantitative methods in real examples. He often sites different examples for increasing our understanding. His teaching complements Professor Schankerman in essence, as he requires everything to be simplified in easy understandable language. His problem sets and their explanations are relevant and understandable.
- Concerned with students learning, put in effort to ensure questions were answered satisfactorily
- Encourages discussion
- Ensuring we understood the math behind the concepts learned rather than just glossing over them.
- Great at explaining ideas, great support, makes the seminar student-oriented.
- Great teacher! Thank you Ameek!
- He elaborates key ideas in detail
- He is friendly and gives confidence to ask questions.
- His teaching approach is very good and he also takes time to answer questions to the satisfaction of students.
- I highly appreciate Ameek patience to explain us everything. He is very detailed on his explanations and he makes sure that everyone gets them. Besides, he corrects us in such way that we can amend the vocabulary and concepts that we use. He is also very patient on his office hours. He is the best TA I have had until now on all the MPP program.

- I love how Professor Singh is so patient in explaining to us the concepts and everything. He goes beyond his office hours to thoroughly explain the course which I truly appreciate. He explains the concepts in their simplest form - making it very understandable. Overall, he is an effective teacher.
- Incredible teacher! Gets to the root of all questions, engages the full class, and no one feels particularly left out.
- Prof. Ameek is very reliable and explains every topic deeply and effectively. He always ensure that every student can understand every concept.
- The seminars with Ameek Singh makes provides me with a very concise and clear approach to the questions. His seminars are very encouraging and effective.
- This teacher is able to explain concepts in real terms.
- Very happy with the style of teaching. A different perspective is brought to the seminar as compared to the lectures which is complementary and reinforces the understanding of the subject matter very well.

1.5) Please comment on aspects of this teacher's teaching you think could be improved.

- A few of his answers to the problem sets are ambiguous and create confusion. Though the confusions are resolved in the classroom. Some of the other issues with the problem sets and lecture examples have already been discussed.
- Ameek systematically arrives late, which is a bit annoying (especially since we then finish the seminar barely on time). It would also be helpful if he could teach up rigorous sentence structures to interpret estimates so as to make sure that we use the right vocabulary and terms.
- As mentioned above, the seminar could be facilitated in a way that every student's time is respected.
- At times , there is a disharmony between what is taught at help session and what he teaches
- Be less technical. Simplify concepts enough for those that do not have a statistical background.
- Better time management, and not getting bogged down in a single student’s questions at the expense of covering relevant material for the seminar
- Certain seminar sessions seemed like office hours as he would take so much time explaining the same question repeatedly to the same student. This led to the rest of the class losing concentration.
- He could improve the way of solving p-sets in a simpler language, linking it with a policy approach.
- None
- None.
- Only comment would be if that if too many questions are asked, the entire problem set doesn't get discussed.
- This teacher’s assessment setting and grading methods are unclear and unreliable.

1.6) Overall, I am satisfied with the teaching by this teacher on the course.
